EDUCATION

Dong Nai Technology University (DNTU) **Bien Hoa, Dong Nai, Vietnam**
Bachelor's in IT – Computer Networks & Information Security *Oct 2023 – Expected 2027*

- **Relevant coursework:** Advanced Computer Networks, Linux Administration, Network Security

COMPETITIONS & ACHIEVEMENTS

Cybersecurity Student Contest Vietnam (CSCV) 2026 – Jeopardy Finals **Oct 2026**

- Ranked **29th of 47** university teams nationwide (1,289 points) at the national finals, representing DNTU after qualifying through the preliminary round.
- Solved **7 CTF challenges** across binary exploitation (PWN), reverse engineering (REV03, REV04), digital forensics (FOR01, FOR02), and web security.

Cisco NetAcad Riders 2025 – Regional Networking Skills Competition **Mar 2025 – Apr 2025**

- Completed routing and switching configuration, network protocol troubleshooting, and infrastructure optimization tasks to Cisco standards (Certificate of Participation).

TECHNICAL PROJECTS

LanFileTool – Peer-to-Peer LAN File Transfer Tool **2026**
Python · TCP Socket · Multithreading · Tkinter · PyInstaller *Solo project*

- Designed and implemented a custom binary protocol directly over TCP sockets to share files between machines on a local network without Internet access.
- Built concurrent multi-client transfers using multithreading, with buffer flow control and data integrity checks; packaged as a Tkinter GUI application with PyInstaller.

OKR / KPI Management System – 24-Hour Hackathon **2026**
Node.js · Express · PostgreSQL · Docker · REST API · Swagger *Team Lead & Backend*

- Led the technical team and designed the REST API architecture and database schema for an employee performance management system within 24 hours.
- Implemented JWT authentication and four-level role-based access control (Admin, HR, Manager, Employee); containerized the system with Docker and documented the API with Swagger.

CERTIFICATIONS & TRAINING (verifiable on Credly)

CCNA: Introduction to Networks – Cisco Networking Academy	Jun 2026
Junior Cybersecurity Analyst Career Path – Cisco Networking Academy	May 2026
7 Cybersecurity Modules: Vulnerability Assessment, Endpoint & Defense	2025 – 2026
CCNA: Switching, Routing & Wireless – Cisco Networking Academy	May 2025

SKILLS

Offensive Security: Nmap, Burp Suite (Proxy, Repeater), Wireshark, Metasploit, GDB, Linux privilege escalation basics, OWASP Top 10
Networking: TCP/IP and OSI models, VLSM subnetting, OSPF, VLAN and inter-VLAN routing, ACL, Port Security, DHCP Snooping, NAT/PAT
Systems & Tools: Kali Linux, Ubuntu, Windows Server, Docker, Git/GitHub
Programming: Python (sockets, multithreading, automation), Node.js/Express, PostgreSQL, Bash
Languages: Vietnamese (native); English (technical reading: RFCs, CVE advisories, CTF write-ups)
